DETAILED ACTION

This is in response to amendment filed on 10/25/04 in which claims 1-38 and 42-49 are pending and claims 39-41 are canceled. The applicant's amendment has been fully considered therefore this is in condition for allowance. In addition the pending have been renumbered as 1-46.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Peter Martinez on 2/25/05.

The application has been amended as follows: In claim 48, line 2, "57" has been replaced with —47---.

In claim 47, line 2, 49 has been replaced with ---42---.

1. The following is an examiner's statement of reasons for allowance: determining an absolute value of a difference of the change in adjacent time bin radio frequency amplitude averages, thereby obtaining a rate of change in adjacent time bin radio frequency amplitude averages as recited in claim 1. Determining a difference between the change of the radio frequency amplitude in corresponding time bins across

successive frames, thereby obtaining a rate of change in the radio frequency amplitude in corresponding time bins across successive frames as recited in claim 13. Averaging the radio frequency amplitude data from the selected pseudo-randomly placed time bins, thereby obtaining an average radio-frequency amplitude in each of the plurality of channels as recited in claims 24 and 42. Where PBER is a projected value of the bit error rate, n is the number of bits transmitted, CL is a confidence level, N is the total number of bits errors that occur during the transmission and k refer to a Kth bit error as recited in claim 49.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Wang U.S. Patent No 6,118,817 teaches a digital video.

Ohguchi U.S. patent No 5,589,884 teaches an adaptive quantization controlled by scene change detection.

Nojima et al U.S. patent No 5,325,203 teaches an adaptively controlled noise reduction device.
